No New Yorker should be left behind as our state recovers from the public health and economic crises introduced and worsened by the pandemic. This is why we are fighting: to create a New York that works for our communities.

New York City and State leadership must act now!

# ABOUT NYCC:

**New York Communities for Change brings neighbors together to build community power. NYCC members use that power to improve their lives and their communities. We use direct action, legislative advocacy and community organizing to fight for a safe and healthy New York.**

**NYCC believes that all people deserve to live in safe and healthy communities. But safety is not a reality for too many New Yorkers. High rents, poor living conditions, climate change, violence, low wages, and lack of a social safety net are in the way of thriving communities. This did not happen by accident. The unsafe conditions we live in are profitable for the industries that control our State. Wall Street, Real Estate, and Oil and Gas corporations make billions by exploiting us and the planet. To win safe and healthy communities for all New Yorkers, we must attack the economic systems that protect profits over human life.**
